Volume 4
The Practice of Jungian Psychoanalysis
This is a practical volume, indispensable for Jungian analysts, Jungian psychotherapists or students hoping to sharpen their analytical skills. It is truly the “nuts and bolts” of Jungian analytical practice.

Volume 5
Analytical Psychology and Christianity
In this volume, Murray Stein illuminates Jung’s relationship with Christianity and how he strove to restore its transcendent symbols.

Volume 6
Analytical Psychology and Religion
This volume continues where Volume 5 left off - the archetypal exploration of religion in general and Christianity in particular, asking what it might look like if we interpreted the Christian Bible as if it were a dream.
The publication of the Diagnostic and Statistical Manual Version 5 (DSM-5, 2013) and the more recent Diagnostic and Statistical Manual Version 5 – Text Revision edition (DSM-5-TR, 2022), together ushered in a major change to the field of mental health diagnosis. DSM-5-TR Insanely Simplified provides a summary of key concepts of the new diagnostic schema introduced in DSM-5 as well as the updated DSM-5-TR. It utilizes a variety of techniques to help clinicians master the new spectrum approach to diagnosis and its complex criteria.

Cartoons, mnemonic devices, and summary tables allow clinicians and students to quickly grasp and retain broad concepts and subtle nuances related to psychiatric diagnosis. DSM-5-TR Insanely Simplified fosters quick mastery of the most important concepts introduced in DSM-5 and continued in DSM-5-TR, while offering an entirely new way of looking at mental health along a continuum. This new approach goes beyond simply “labeling” clients with various diagnoses, but rather places them along spectrums that range from normal to problematic symptoms. Mental health professionals and laypeople will appreciate the synthesis of deep psychology and modern approaches to the diagnosis of mental illness.

The essays in the series are geared to the recognition that the posthumous publication of The Red Book: Liber Novus by C.G. Jung in 2009 was a meaningful gift to our contemporary world.

“To give birth to the ancient in a new time is creation,” Jung inscribed in his Red Book. It is significant that this long sequestered work was published during a period in human history marked by disruption, cultural disintegration, broken boundaries, and acute anxiety.

Volume 5, the final volume in the series, contains essays that were delivered at the Eranos Symposium on “Jung’s Red Book for Our Time: Searching for Soul in the 21st Century,” held at Monté Verità Conference Center in Ascona, Switzerland in 2022.

Hauntings

James Hollis considers one’s transformation through the invisible world—how we are all governed by the presence of invisible forms—spirits, ghosts, ancestral and parental influences, inner voices, dreams, impulses, untold stories, complexes, synchronicities, and mysteries—which move through us, and through history. He offers a way to understand them psychologically, examining the persistence of the past in influencing our present, conscious lives and noting that engagement with mystery is what life asks of each of us. From such engagements, a deeper, more thoughtful, more considered life may come.

The Broken Mirror

This book explores the need to know ourselves more deeply, and the many obstacles that stand in our way. The various chapters illustrate internal obstacles such as intimidation by the magnitude of the project, the readiness to avoid the hard work, and gnawing self-doubt, but also provide tools to strengthen consciousness to take these obstacles on. Additional essays address living in haunted houses, the necessity of failure, and the gift and limits of therapy. Most of all, Hollis addresses the resources we all have within, or can obtain for ourselves, to lead a more abundant life and to step into larger possibilities for our unfolding journeys.

Prisms: Reflections on This Journey We Call Life

This book summarizes a lifetime of observing, engaging, and exploring why we are here, in service to what, and what life asks of us. These eleven essays, all written recently, examine how we understand ourselves, and often we have to reframe that understanding, the nature and gift of comedy, the imagination, desire, as well as our encounters with narcissism, and aging.

The Best of James Hollis: Wisdom for the Inner Journey

A collection of excerpts from the writings of James Hollis, these selections, compiled by editor Logan Jones, span across his body of work from The Middle Passage (1993) to Prisms (2021) and are organized into different topics ranging from the psychological concepts of Carl Jung to the everyday tasks of our living and callings.

**Religious But Not Religious: Living a Symbolic Life**

In *Religious But Not Religious*, Jungian analyst Jason E. Smith explores the idea, expressed by C. G. Jung, that the religious sense is a natural and vital function of the human psyche. We suffer from its lack. The symbolic forms of religion mediate unconscious and ineffable experiences to the field of consciousness that infuse our lives with meaning and purpose. That is why we cannot be indifferent toward the decline of traditional religious observance so widely discussed today. The great religions house the accumulated spiritual wisdom of humankind, and their loss would be catastrophic to the human soul.

**Map of the Soul 7: Persona, Shadow & Ego in the World of BTS**

When you stand on the threshold of a new land, it is useful to have a map as your guide. The great psychologist of the 20th Century, Carl Jung, created a *Map of the Soul* that many people in his time found more than a little helpful, even lifesaving. It is even more so now, for people in the 21st Century caught in the profound complexities of modern life. Equipped with this map, individuals can navigate through life’s journey with greater success. This book aims to present this map as clearly as possible.

BTS, the Korean K-pop band, is widely considered the world’s most popular band. Fans of BTS have been struck by the profound depth of meaning in the songs featured in their recent album, *Map of the Soul 7*. These songs encourage listeners to reflect deeply on the nature of ambition, the perils of worldly success, and the human spirit’s resilience to overcome challenges. They serve as a guide for individuals embarking on life’s journey, particularly in navigating challenging relationships. The songs are reflective, offering a mirror to our struggles to become and flourish.

*Map of the Soul 7: Persona, Shadow & Ego in the World of BTS* is a book that not only presents an internal map of our souls but does so within the context of a BTS album that is transforming the lives of millions of young people. It serves as a compass for those venturing into new lands.
Inner Gold – Understanding Psychological Projection

Robert A. Johnson, bestselling author of He, She, We, and other psychology classics, shares a lifetime of insights and experiences in this easy-to-read explanation of psychological projection — seeing unacceptable traits in others that are actually within us. Drawing on early Christianity, medieval alchemy, depth psychology, and the myths of “The Flying Dutchman” and “The Once and Future King,” he also explores the subjects of loneliness, fundamentalist religion, and the spiritual dimensions of psychology.

One of the most influential and visionary analysts of his generation, Johnson follows the tradition of Carl Jung and Joseph Campbell whose ideas shed light upon our deepest metaphors of self and psyche. Johnson’s books are known for presenting Jung’s complex theories with simplicity and grace.

With twinkling eyes and the smile of a wise old man, Robert Johnson brings us the wisdom of a life fully lived….The healing power of Robert’s writing is palpable.

- Marion Woodman

Robert Johnson’s work always has that naked intensity that tells you you’re in the psychic house of an honest man.

The War of the Gods in Addiction

C.G. Jung, Alcoholics Anonymous, and Archetypal Evil

The War of the Gods of Addiction, based on the correspondence between Bill W., one of the founders of Alcoholics Anonymous, and Swiss psychiatrist, C.G. Jung, proposes an original, groundbreaking, psychodynamic view of addiction. Using insights from Jungian psychology, it demonstrates why the twelve steps of AA really work.

Facing the Dragon

Confronting Personal and Spiritual Grandiosity

Structured around a series of lectures presented at the Jung Institute of Chicago in a program entitled “Jungian Psychology and Human Spirituality: Liberation from Tribalism in Religious Life,” this book-length essay attacks the related problems of human evil, spiritual narcissism, secularism and ritual, and grandiosity. Robert Moore dares to insist that we stop ignoring these issues and provides clear-sighted guidance for where to start and what to expect. Along the way, he pulls together many important threads from recent findings in theology, spirituality, and psychology and brings us to a point where we can conceive of embarking on a corrective course.

The Soul in Anguish
Psychotherapeutic Approaches to Suffering
The Soul in Anguish presents a variety of approaches to psychotherapeutic work with suffering people, from the perspectives of both Jungian and psychoanalytic psychology. An important theme of the book is the impact of suffering—suffering may be harmful or helpful to the development of the personality. Our culture tends to assume that suffering is invariably negative or pointless, but this is not necessarily so; suffering may be destructive, but it may lead to positive developments such as enhanced empathy for others, wisdom, or spiritual development.

The Sacred Cauldron
Psychotherapy as a Spiritual Practice
At a time when psychotherapy seems to be a purely secular pursuit with no connection to the sacred, The Sacred Cauldron makes the startling claim that, for both participants, psychotherapeutic work is actually a spiritual discipline in its own right. The psyche manifests the sacred and provides the transpersonal field within which the work of therapy is carried out. This book demonstrates some of the ways in which a spiritual sensibility can inform the technical aspects of psychotherapy.

The God-image
From Antiquity to Jung
This book describes the development of images of God, beginning in antiquity and culminating in Jung’s notion of the Self, an image of God in the psyche that Jung calls the God within. The book makes the startling claim that, for both participants, psychotherapy seems to be a purely secular pursuit with no connection to the sacred. The Self has been projected onto many local gods and goddesses and given different names and attributes. These deities are typically imagined as existing in a heavenly realm, but Jung’s approach recalls them to their origins in the objective psyche.
**The Bible as Dream**
A Jungian Interpretation

Recognized as a winner in the Applied Category of the American Board & Academy of Psychoanalysis’ 2019 Book Awards. Murray Stein shares these timeless lectures—a work of respectful and loving interpretation. The Bible presents a world elaborated with reference to a specific God image. The biblical world is the visionary product of a particular people, the ancient Hebrews and the early Christians, who delved deeply into their God image and pulled from it the multitude of perspectives, rules for life, spiritual practices, and practical implications that all together created the tapestry that we find depicted in the canonical Bible.

**Four Pillars of Jungian Psychoanalysis**

The Four Pillars of Jungian Psychoanalysis by Murray Stein is a work that describes the methods that in combination sets this form of psychotherapy apart from all the others. The first chapter describes how the theory of individuation serves as an assessment tool for the analyst and guides the process toward the client’s further psychological development. The second chapter, on the analytic relationship, discusses the depth psychological understanding of the healing effect of the therapeutic encounter.

**Men Under Construction**
Challenges and Prospects

Today more than ever men are challenged to take steps toward greater consciousness and psychological development. In these lectures Murray Stein describes five “eras” or stages in a lifelong process of psychological and spiritual growth, as well as speaking about friendship between men and the archetypal gestures of fathering. The lectures are intended to help men of all ages to orient themselves in their lives as they search for meaning and seek personal development.

Using the myths of Orestes and Prometheus as examples, he defines solar conscience as an inner voice that represents the values of society, and lunar conscience as an instinctive inner sense which seeks to fulfill underlying qualities of right and wrong.

The Principle of Individuation
Murray Stein
Toward the Development of Human Consciousness
The Principle of Individuation suggests new approaches, on both personal and communal levels, for gaining freedom from the compulsion to repeat endlessly the dysfunctional patterns that have conditioned us. In this concise and contemporary account of the process of individuation, Murray Stein sets out its two basic movements and then examines the central role of numinous experience, the critical importance of initiation, and the unique psychic space required for its unfolding.
The Zürich Lecture Series in Analytical Psychology is hosted by the International School of Analytical Psychology Zürich (ISAPZURICH) and Chiron Publications to present annually new work by a distinguished scholar who has previously offered innovative contributions to the field of Analytical Psychology by either:

- bringing analytical psychology into meaningful dialogue with other scientific, artistic, and academic disciplines
- showing how analytical psychology can lead to a better understanding of contemporary global concerns relating to the environment, politics, religion
- expanding the concepts of analytical psychology as they are applied clinically

Each year, the selected lecturer delivers lectures in Zürich based on a previously unpublished book-length work. This book is then published by Chiron Publications. Murray Stein, Leonard Cruz and Steven Buser are the Series Editors.

The Self in Jungian Psychology
Theory and Clinical Practice

Winner of the 2022 IAJJS (International Association for Jungian Studies) Book Awards. Realizing the Self is the absolute goal of Jungian psychology. Yet as a concept it is impossibly vague as it defines a center of our being that also embraces the mystery of existence. This work synthesizes the thousands of statements Jung made about the Self in order to bring it to ground, to unravel its true purpose, and to understand how it might be able to manifest.

Edited by Leslie Stein, these essays are personal, engaging, and contain a refined analysis of whether these two paths may work together or are pointing to different end points. Contributors include: Ashok Bedi, Lionel Corbett, Royce Froehlich, Karin Jironet, Patricia Katsky, Ann Chia-Yi Li, Jim Manganiello, Judith Pickering, Leslie Stein, Murray Stein, and Polly Young-Eisendrath.

Mythodramas main focus are specially selected stories, which mirror the issues of the respective group, connect to the issues of the group, and serve as an entrance to the imaginal. One of the most powerful narratives gripping scientists, intellectuals, and the general culture in Europe during the early decades of the twentieth century was that the world had become disenchanted: stripped of genuine mystery, lacking inherent meaning, and unrelated to any spiritual or divine reality. Roderick Main examines various ways in which C.G. Jung's analytical psychology, developed during this same period, can be seen to challenge that dominant narrative.

Tracking the Wild Woman Archetype
A Guide to Becoming a Whole, In-divisible Woman

Relationships can serve as the alchemical vessels of a woman’s psychological transformation. *Tracking the Wild Woman Archetype* finds that the paradoxes and impossibilities of love serve to create a more profound woman who is more conscious of the manifold world of unconscious archetypes. It tracks the process of individuation and alchemical transformation through the study of texts, the author’s lived experience, and imaginal ways of knowing, such as dreams, synchronicities, and active imaginations.

Love and Soul-Making
Searching the Depths of Romantic Love

_**Love and Soul-Making**_ brings awareness to both the patriarchal origins of romance and the unarguably magical, archetypal experience of love. Relationships can serve as an alchemical vessel for the development of the soul as part of the individuation process. The struggles of relationships, whether one is partnered or not, can allow us to engage more deeply with the psyche and can guide us further into her territory. For those experiencing romantic difficulties, the myth of Psyche and Eros can serve as a guide to the stages involved in soul-making and how that is enacted in human relationships. This book encourages contemplating relationships both literally and metaphorically. With metaphorical vision, we create possibility for the alchemical transmutation process and the development of the soul. This book provides context to the soul-making process, and it can help to re-animate your creativity and vitality. 

Soul (Psyche) follows what she loves (Eros).

A helpful and enlightening guidebook from an expert couples therapist that demystifies the challenges of love, then teaches us about six "love capacities" any couple can develop to set them on the path of a soulful, enduring relationship.

This book brings awareness to both the patriarchal origins of romance and the unarguably magical, archetypal experience of love. Relationships can serve as an alchemical vessel for the development of the soul as part of the individuation process.

This book focuses on family stories—how people met the love of their life, striking coincidences that are shared, the future can remain dormant—

The book is described (and still is) as "provocative and vital."

It has become a classic read for those readers—of which there are many— that are interested in exploring the unarguably magical, archetypal experience of love. Relationships can serve as an alchemical vessel for the development of the soul as part of the individuation process.

The Role of Alchemy in Goethe's Faust
This book is about hope and optimism for the future. The recorded history of our world is largely one of a sometimes worthy, patriarchal striving. It has, however, all too often been tarnished, marred, and horribly disfigured by the hatreds, intolerance, and destruction that have accompanied it. And the good news? There is another way, poignantly and persuasively outlined nearly two hundred years ago by Johann Wolfgang von Goethe, involving the Divine Feminine.

Welcome to Chiron Publications, serving the Jungian community for over 40 years. We have well over 300 books to browse. Please take special notice of our ongoing series, including the Collected Works of Marie-Louise von Franz and the Collected Writings of Murray Stein. Visit our website, chironpublications.com, regularly to see the latest books and ordering options online.

Drs. Murray Stein and Nathan Schwartz-Salant founded Chiron Publications in 1983 with a view to adding new and significant contributions to Jungian literature with a particular emphasis on clinical writing. In time the list grew to include many other related materials. Murray began his career in publishing in 1970 with Dr. James Hillman, then owner of Spring Publications located in Zurich, Switzerland. In 1982, the idea for a new publishing company was born at a lunch in Santa Fe, New Mexico. Nathan’s connections in New York combined with both of their connections throughout the Jungian world proved invaluable as Chiron Publications added authors and expanded its collection of titles. Chiron Publications went on to publish a wide variety of books by Jungian analysts and others in the field of depth psychology, myth and society.

After building a well-respected, publishing company for 30 years, Murray and Nathan decided the time had come to pass Chiron on to the next generation. Their growing confidence in Drs. Steven Buser and Leonard Cruz led them to reach out to these two practicing psychiatrists with a demonstrated interest in Jung and to hand over the company into their keeping.

Dr. Steven Buser, a graduate of the Clinical Training Program of the C.G. Jung Institute of Chicago, and Dr. Leonard Cruz, an avid student of Jung since residency years, had pioneered online education in the Jungian arena through the Asheville Jung Center. Steve and Len have practiced together for over 20 years and their combined gifts have been the recipe for Chiron’s renewed growth. Murray remains committed to Chiron Publications and continues to serve in an emeritus capacity.

Chiron has published the works of many notable authors including: Marie-Louise von Franz, Edward Edinger, Barbara Hannah, Robert Johnson, Murray Stein, Nathan Schwartz-Salant, James Hollis, Verena Kast, Carlos Byington, Aldo Carotenuto, John Boe, Deike & Ean Begg, Rafael Lopez-Pedraza, Sheila Zarrow, Harry Wilmer, Robert Moore, and many more.

Chiron’s headquarters are now located in beautiful Asheville, North Carolina—a city with a rich literary heritage that includes O. Henry, Thomas Wolfe, and F. Scott Fitzgerald.
